

We are a family company with over 30 years of nursery tradition. We started our operations by producing fruit trees and shrubs.

Currently, the area of Nursery Zygmunt and Jacek Jurgielewicz covers the area of over 60 ha.

We specialise in coniferous and deciduous decorative plants, fruit trees and shrubs as well as creepers.

We offer plants types and varieties in containers and from the ground.

The large offer of qualified nursery material is provided for nurseries, orchards, garden centres, municipal greenery maintenance centres, contractors, landscape designers, gardeners.. and all plant lovers.

Our plants are popular among domestic and foreign customers (the Netherlands, Lithuania, Latvia, Germany, Sweden, Hungary).

Our company has well developed technical facilities and applies modern production technologies.

Our nursery has been registered by the State Inspectorate for Plant Protection and Seed Production in Olsztyn.
